JOB TITLE

Software Quality Assurance Engineer

PURPOSE

4DMobile is seeking an experienced Software Quality Assurance Engineer to help ensure our cutting-edge software functions according to requirements and customer needs. With a strong knowledge of testing, you will define metrics to provide insight on software quality throughout the development cycle.

The Software Quality Assurance Engineer is a key position- your efforts will have an impact on both the company and the product. As part of an Agile team, you will work closely with developers, the product owner, project management, customers, and other key stakeholders. Successful candidates will have a passion for high-quality software testing, strong DevOps principles, methodical problem-solving skills.

RESPONSIBILITIES

- Create and document test plans, suites, and cases.
- Execute manual tests for mobile tablet applications and cloud-based web portal.
- Write-up bugs found during testing and add them to the backlog.
- Execute automated tests reliably and efficiently to gather data for analysis. Work with our data analyst to interpret test results and report them to stakeholders.
- Collaborate with product manager and development team to understand how existing and new features should be tested.
- Collaborate with developers in software development process.
- Drive innovation and streamline overall testing processes.
- Identify any potential problems that users might encounter.
- Review user interfaces for consistency and functionality.

REQUIRED SKILLS & EXPERIENCE

- Bachelor's degree in computer science or related field, or equivalent experience.
- 5+ years of work-related experience in software testing.
- Experience with initiating and executing manual testing, automated testing, white box testing, black box testing, system testing, and performance testing.
- Good knowledge of continuous integration/deployment process and tools.
- Working knowledge of software development and release tools such as Azure DevOps.
- Strong verbal, written, and interpersonal skills enabling effective communication across the organization.
- Critical thinking with an eye for detail.
- Ability to meet deadlines, with excellent time management and organizational skills.
- Ability to have fun!

COMPENSATION

- Salary plus incentive compensation in line with experience / qualifications
- Paid vacation and holidays
- Company 401k program
- Company health, dental and vision plan
- Company life insurance and Short/long term disability
